

## Customization of Auto Catcher

### Advice how to select model and install it for Auto Catcher

This is for customers who worry how to install Auto Catcher, whether option Jigs or extra parts are necessary. We can teach it on free of charge.

We welcome your customization.

In such case we need DXF data both of Press Machine and Dieset

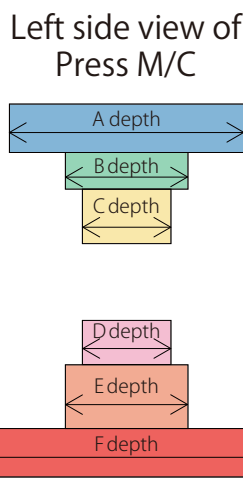

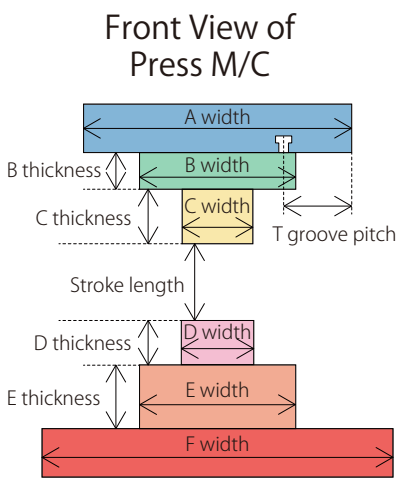

Or you are requested to send us the following information.

We are waiting for your enquiry without any hesitation.

#### Information of Press Machine

The manufacturer:

Model:

Unit : mm

Name	Width	Depth	Thickness
A : Upper Bolster			
B : Upper Dieset			
C : Upper Die			
D : Lower Die			
E : Lower Dieset + Block(Yokan)			
F : Lower Bolster			
Work			
T Groove pitch			
Stroke Length			

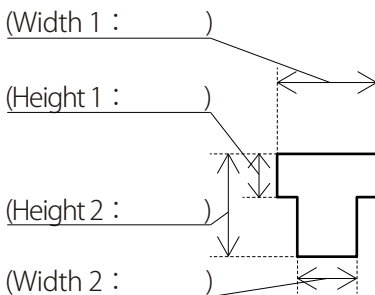

※Installation position of Dieset and Work falling position should be centre. Otherwise contact us.

※In case that your stroke length is adjustable, state stroke length used by you.

#### T Groove dimension

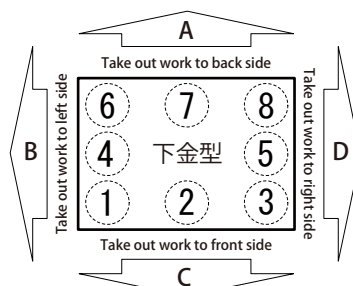

- mention each dimension

Unit : mm

#### Unloading direction and position of Guide Post

- Select unloading direction out of A -D
- Select Guide Post position out of 1-8

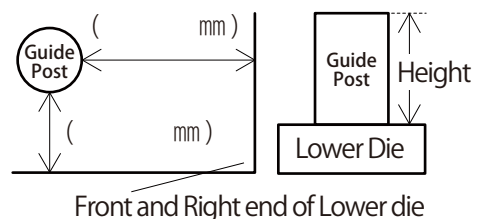

#### Information of Guide Post

- State Dia., Height and installation position of Guide Post

※As for the installation position, state the nearest place to front side and right side

Dia. :	$\varphi$	Height :	mm
